Groundwater Basin	Yuba Groundwater Basin
Project Type (highlight in gray all that apply)	Conceptual Feasibility Study Study/Assessment Planning Engineering/Design Permitting CEQA/NEPA Facility Construction Restoration Monitoring Best Management Practices Acquisition Demonstration/Pilot Project

¹ Completed Project Short Forms should be sent via email to Katie Burdick at admin@burdico.net

Project Description

Write a narrative briefly describing the project components and/or characteristics (maximum of 300 words).

These projects will include analysis and improvement of 75 miles of levee within Reclamation District (RD) 10, RD 784, RD 817, RD 2103, and the Marysville Levee District with the near-term goal of 200+-year level of protection for urbanized areas and a 100-year level of protection for rural areas. There are ongoing efforts for levee improvements in the RD 784 and RD 2103 areas, along with a Corps of Engineers' Yuba Basin Feasibility Study that covers RD 784 and Marysville. Costs for these improvements will be estimated from ongoing efforts.

Team will work with MBK and YWA to create multiple, fundable projects to meet these objectives.

I. Project Rationale/Issues Statement

Briefly describe the need for the project and the desired outcomes/deliverables (maximum of 200 words).

The project addresses the following identified regional issues:

Flood Management

- Improve integrated flood management to ensure better emergency preparedness
- Increase flood protection and enhance floodplain functions and habitat
