Yuba IRWMP-MARY-13

Project Solicitation Form 2019¹

Please fill out the following information to the best of your ability/knowledge. Once the project has been received and a preliminary review completed, the project team will work with you to develop additional information.

Project Sponsor Contact Information

Lead Agency/Organization	City of Marysville	
Name of Primary Contact(s)	Marti Brown	
Mailing Address	526 "C" Street, Marysville CA 95901	
Email Address	mbrown@marysville.ca.us	
Phone (###) ###-####	(530)749-3901	
Project	N/A	
Partners/Collaborators		

General Project Information

Project Title	Marysville Stormwater Pollution Prevention Plan
Project Total Budget, based	\$300,000
on current knowledge	
Project Funding Match, if	None
any	
Total Project Funding	\$300,000
Request	
Can a detailed cost	No, rough estimate
estimate be provided upon	
request?	
Project Location (map if	City Boundary
available)	
City/Community	Marysville
Watershed/subwatershed	Yuba/Feather (at the confluence)
Groundwater Basin	North Yuba Subbasin
Project Type	Conceptual
(highlight in gray all that	Feasibility Study
apply)	Study/Assessment
	Planning
	Engineering/Design
	Permitting
	CEQA/NEPA
	Facility Construction
	Restoration
	Monitoring
	Best Management Practices
	Acquisition
	Demonstration/Pilot Project

 $^{^{1}}$ Completed Project Solicitation Forms should be sent via email to Katie Burdick at $\underline{admin@burdico.net}$

Project Description

	Write a narrative briefly	describing the	project com	ponents and/o	or characteristics (maximum of 300 words).
--	---------------------------	----------------	-------------	---------------	----------------------	------------------------

Marysville requires a Stormwater Pollution Prevention Plan (SWPPP), due to the fact that City facilities convey stormwater into local lakes and waterways. A SWPPP is a fundamental requirement of stormwater permits and identifies all potential sources of pollution which may reasonably be expected to affect the quality of stormwater discharges from a construction site. The City's SWPPP will provide guidance on best management practices and mitigation measures to reduce the potential for stormwater pollution for construction site operators, City capital construction planning as well as any other or external agencies conducting work within the City limits.

I. Project Rationale/Issues Statement

Briefly describe the need for the project and the desired outcomes/deliverables (maximum of 200 words).

A SWPPP is a mandatory requirement for any City that conveys Stormwater to any public waterway. The City does not have an existing SWPPP. The SWPPP will manage and allow for the demonstration of compliance with the existing NPDES permit. A Component in the SWPPP will also include public outreach messaging and marketing of stormwater concerns to help City residents better understand stormwater and the importance of protecting it from pollutants.
