**PROJECT DESCRIPTION**

Write a narrative briefly describing the project components and/or characteristics (Suggest ~ 300 words).

Due to the nature of both existing wells and groundwater, domestic wells on Trainer Hill have been impacted during dry periods over the past several years. The Project would seek to address water supply issues in the Trainer Hill area though outreach and coordination with domestic well owners and surrounding agricultural interests.

**PROJECT RATIONALE/ISSUES STATEMENT**

Briefly describe the need for the project and the desired outcomes/deliverables (Suggest ~ 200 words). Include an explanation of benefits and how they would be evaluated.

The Project is a first step towards improved water supply conditions on Trainer Hill. The outcome of the Project will be an assessment of conditions, issues, and potential projects. Those projects could include increased use of the existing non-potable piped water system, limitations on new wells near Trainer Hill, or provision of well depth recommendations for new wells in the area.
