Project Description

Write a narrative briefly describing the project components and/or characteristics (maximum of 300 words).

California has mandated that all water connections be metered by 2025. Due to the complexity and uniqueness of some of the water connections in Old town Olivehurst, we have not been able to meter some 500 connections. The time and manpower required to do so is too much for our current staffing and workload. We are proposing hiring a contractor to install meters on all remaining unmetered connections.

I. Project Rationale/Issues Statement

Briefly describe the need for the project and the desired outcomes/deliverables (maximum of 200 words).

This is a California mandated requirement that we may struggle to do both practically and financially. If this project is funded, we will be able to meet the requirement in time and be able to focus our work force on other projects within our district.
