

Yuba IRWMP – RD10-09

Project Short Form¹

Please fill out the following information to the best of your ability/knowledge. Once the project has been received and a preliminary review completed, the project team will work with you to develop additional information.

Project Sponsor Contact Information

Lead Agency/Organization	Reclamation District No. 10
Name of Primary Contact(s)	Sarb Johl, President
Mailing Address	9274 HWY 70, Marysville, CA 95901
Email Address	
Phone (###) ###-####	Office: 530-682-9916
Project Partners/Collaborators	

General Project Information

Project Title	RD 10 – Simmerly Slough Vegetation Clearing & Flapgate Modification
Project Total Budget, based on current knowledge	\$100,000
Project Funding Match, if any	\$0
Total Project Funding Request	\$100,000
Can a detailed cost estimate be provided upon request?	Yes
Project Location (map if available)	Project location map available upon request.
City/Community	Marysville (RD 10)
Watershed/subwatershed	Sacramento Valley
Groundwater Basin	Sacramento Valley North Yuba 5-021.60
Project Type (highlight in gray all that apply)	Conceptual Feasibility Study Study/Assessment Planning Engineering/Design Permitting CEQA/NEPA Facility Construction Restoration Monitoring Best Management Practices Acquisition Demonstration/Pilot Project

¹ Completed Project Short Forms should be sent via email to Katie Burdick at admin@burdico.net **and** Elizabeth Herrera at Elizabeth.herrera@fishsciences.net

Project Description

Write a narrative briefly describing the project components and/or characteristics (maximum of 300 words).

In 2021 RD 10 identified an overgrowth of vegetation along a landside ditch of Simmerly Slough downstream of Woodruff Lane to the confluence of the Yuba River. The vegetation overgrowth impedes maintenance equipment access and impairs inspection responsibilities of RD 10. Vegetation removal may be accomplished via hand crews, long stick excavator, or mastication.

In addition, to reduce vegetation growth, which is being exacerbated by improper drainage, modifications to an existing culvert flapgate (No. 29) will be evaluated and potentially repaired.

I. Project Rationale/Issues Statement

Briefly describe the need for the project and the desired outcomes/deliverables (maximum of 200 words).

Funding requested is needed to support vegetation removal at critical locations along Simmerly Slough. Removal of the vegetation will allow RD 10 to safely inspect the landside toe of the levee embankment and perform various operations and maintenance tasks and support PL 84-99 eligibility.

The desired outcome would be for vegetation to be removed via various methods to support proper inspection and operation and maintenance access.
